P-3 Needs Assessment

P-3 Needs Assessment

Organization of Assessment

1. Strengthening the P-3 Pipeline

- o Alignment
- o Transitions
- o Enrollment data collection
- o Family engagement

2. Improving Program Quality

- Equity-focused decisionmaking
- o Instructional leadership/change management
- Curriculum-instructionassessment cycle
- o Professional learning

3. Increasing System-wide Impact

- o Program delivery options
- o Funding
- o Connecting with communities
- o Strategic direction and evaluation

The needs assessment lays out anchor questions and potential evidence of best practice in each of the twelve areas, and ask district teams to reflect on district practices which meet criteria in the getting started, moving ahead and institutionalizing. District teams complete the needs assessment and then create a plan with goals that will 'build the bridge' to the action planning template.

	T	Г ,	
	□ We have conducted cross grade and cross-classroom walkthroughs to develop beginning understanding of similarities and differences in environments, curriculum goals, teaching practices, and assessment practices. □ We have reviewed our professional development offerings for P-3 teachers to ensure training includes topics related to child development and planning age appropriate learning experiences. □ We have reviewed classroom experiences (curriculum and instruction) across P-3 to ensure they are aligned to and support standards. □ We have reviewed family engagement practices across P-3 to identify opportunities to increase continuity.	classrooms - particularly preschool and Kdg. □ P-3 teachers regularly conduct cross-classroom visits to as a way to continuously identify opportunity to increase continuity. □ P-3 teachers work in horizontal teams for co- planning □ We are examining opportunities to increase temporal continuity by increasing access to learning opportunities across the school year – including out- of-school time. □ P-3 teachers work together to develop family engagement opportunities and activities the help families track children's progress across levels and participate appropriately in planning and supporting learning at home.	instructional goals Establishing a continuum of student supports based on student performance Assessments across P-3 are designed to scaffold learning goals from one level to the next P-3 teachers participate in joint professional development focused on common topics of inquiry or content areas P-3 teachers participate in PLCs and meet in within-grade and cross- grade teams to discuss successes and challenges faced in their classrooms and strategies for strengthening alignments. We have established policies and procedures to support out-of-school learning opportunities for all students
Strengthening the P-3 Pipeline/Transitions	□ We are familiar with the research on the importance of transitions and the federal ESSA requirements for increasing positive academic outcomes and family engagement through effective transitions □ We have identified key cross-sector stakeholders who should be involved in school and district-based transition planning and implementation (perK and K teachers and administrators, families, and community organizations and agencies such as libraries, faith-based organizations, family-support agencies).	□ DISTRICT: We have identified a person/position to support transition planning and implementation in schools □ We have recruited and oriented a cross-sector transition team representative of the diversity within our families, school and community. Members include: ○ School and community-based Pre-K program administrators ○ Kindergarten and preschool teachers (community and school-based)	□ Formal Kindergarten transition policies and procedures are integrated into annual school improvement plans. □ We have a comprehensive transition plan in place for all grade levels, which includes activities, information sharing and building of relationships between families, children and educators. □ MOU's are in place between schools and community-based preschools and Head Start programs to share data on

Families in-coming students. ☐ We have developed Community stakeholders strategies and resources to □ MOU's or other share information and agreements are in place to ☐ Our transition team meets facilitate on-time ensure joint professional regularly to secure internal development opportunities Kindergarten enrollment buy-in, support and develop with families and the are available for outreach and engagement broader community (e.g. community- and schoolplans, and monitor ongoing Kindergarten Roundup; based teachers and leaders transition activities. public service P-3 announcements, etc.) ☐ An ongoing variety of kindergarten transition ☐ We have a process and ☐ We have begun to a policy in place monitor activities designed to share research and identify transition outcomes and information with families and effective transition activities make adjustment to school prepare children are available to support important transition plans across time and settings (P-3) connections to schools ☐ A variety of transition including activities focused activities have been designed on: and made available to 0 Supporting children encourage family participation Informing families in home learning activities P-3 Connecting to □ Families have community providers opportunities to meet one-onand stakeholders one with teachers and/or other school staff prior to ☐ We have developed their child starting school. (e.g. information and resources home visits, family-teacher for transitioning families that conferences, etc.) is shared in the home language about the grade □ We conduct joint level (expectations and professional development procedures) their child is activities for community based entering. and public school educators focused on creating a common understanding of effective transitions. ☐ We provide opportunities for cross-classroom visits for sending and receiving teachers ☐ We support and provide time for teachers from sending and receiving grades (school and communitybased) to meet together to share information on expectations and where possible on individual children ☐ Strategies are in place to support families of DLL's and children with special needs

Strengthening the P-3 Pipeline/ Enrollment data collection We have analyzed current enrollment forms to identify redundancies and gaps in information collected. We have identified at points we need to collect to better understand children as they enter our programs and schools We have identified and met with community early learning and classroom-based instructional planning and classroom-based instructional planning and classroom-based instructional planning and classroom-based instructional planning and chassroom-based instructional planning that includes: Previous learning Special needs Parent goals and Home language Special needs Parent goals and expectations We have collected population data about children and families in the district/school catchment area to understand potential challenges to completing enrollment forms. We have a plan in place for reviewing and analyzing family and child data collected to ensure it meets enrollment goals.			all and the main in the	
Strengthening the P-3 We have analyzed current enrollment forms to identify redundancies and gaps in information collected. Improving Program Quality/Equity- focused decision- making	☐ Families, representative of the diverse populations within the school, actively participated in the development of the school improvement plan.	☐ Teachers and parents engage in a shared decision-making process throughout the school year starting with determining the child's learning goals at the beginning of the school year.	☐ Students, families and staff are informed before major decisions are made and consulted as to the impact of the outcomes of those decisions on their lives.
	☐ Schools implement intentional strategies to make all families and students feel welcomed in the school and classroom environments.	☐ School and district administrators seek multiple perspectives (parents with children with special needs, dual language learners, foster parents and guardians,	☐ School resources are shared or distributed based on students' needs and talents.
	☐ School events, activities and meetings are scheduled on different days and at different times throughout the school year (before, at lunch time and after school	families living in shelters or transitional housing etc.) before making decisions impacting the school/district community.	☐ School improvement plans are revised based on data gathered from all stakeholders. ☐ Leaders of school councils, advisory boards

	☐ Assessments are appropriate for use with the diversity of children in the classroom/program	☐ Curriculum-embedded assessments are used as possible	implemented and used to enhance/triangulate with outcome data collected through child assessments
Improving Program Quality/ Professional learning	□ Instructional leaders create dedicated time and space for teacher professional learning throughout the school year. □ Teachers provide input to the content and focus of professional learning days. □ Instructional leaders, in collaboration with teachers, develop individualized professional development plans for all staff. □ Professional development opportunities provide a mix of information and practice-based opportunities to apply learning in the classroom.	□ Teachers are afforded time and opportunities to design and lead professional learning experiences for their peers. □ Instructional leaders develop master schedules and staffing patterns that support the implementation of withingrade professional learning communities focused on student data. □ P-3 teachers are provided opportunities for intra visits to observe in classrooms at other schools and in early learning programs. □ P-3 teachers have opportunity to participate in joint professional development and training □ P-3 teachers are given opportunities to take on leadership roles (Master Educator, Lead Teacher, PD Coordinator, Teacher Mentor, etc.)	□ We have policies in place that support the implementation of professional learning communities (both horizontal and vertical) focused on student work and progress □ The district has a coaching model that supports alignment and continuity across P-3 □ We have policies and procedures in place that support the career advancement of our teaching staff.
Increasing System-wide Impact/Program delivery options	 □ We offer full-day kindergarten for all age-eligible children. □ We are connected to community-based early intervention programs and serve as a feeder school for children ready to transition to inclusive classrooms. □ Families enroll at their local/home school 	 □ We offer part or full day pre-k to eligible children (may be based on income eligibility or special education status). □ We offer a mixed pre-K delivery system with classrooms in both school building and community-based programs. □ We offer community-based pre K programs access to professional develop and training. □ We offer parent education services onsite that recognizes 	□School entry begins at the PK3 level ensuring two years of early learning prior to kindergarten entry for all children. □We include family support services onsite that address the stressors that impact families in our school community. □We offer a mixed delivery system including Head Start and community-based providers.
